Two way lighting wiring diagram

Download

Download

Two way switching is the most common requirement for many household and commercial lighting solutions. Whether it is the switching of a light from two different places inside a domestic dwelling or switching a series of lights in a commercial environment, two-way lighting circuits provide a cost effective and easy solution. Similarly to a simple one way lighting circuit, the Neutral is taken straight to the light itself, while the Line conductor is fed through a series of switches before reaching the light. While this diagram describes the circuit in its most efficient form, the only way to wire it is with the use of Singles Cable. This type of cable is only used in industrial environment where the cables are enclosed in steel conduit or trunking for mechanical protection. This cable is relatively cheap and easy to work with. It comes in many different sizes, but the most common size for wiring lighting circuits is the 1. This cable is usually protected by a 6A MCB. Off course cable sizes and protective device requirements can vary from job to job. In order to do this, we will have to use the circuit diagram provided below click to enlarge :. It is essentially the same circuit diagram as the one on the top of this page, but with the utilisation of modern cable arrangements for domestic and commercial wiring. Step 1: The first step is to wire up the light pendant. The first length of cable will be from the supply to the light itself. Usually the light base or pendant provides all the terminals necessary to wire up the lighting circuit. If this is not the case, push-in or strip connectors are the preferred way of connecting up the circuit. Connect the supply Line conductor to the spare L terminal and connect the Neutral conductor to the N terminal, together with the lamps Neutral wire. This must only be done after the whole circuit is finished and fully tested to comply with BS Also, a Safe Isolation Procedure will have to be carried out! Connect the Line brown wire to the L terminal, together with the supply cable Line wire and connect the blue wire with the brown slewing to the SWL terminal together with the lamps Line wire. Do not forget to use brown slewing on the blue wire! This is needed to indicate that an otherwise Neutral wire blue is now being used as a switched Line wire. Once connected the light pendant should look like this click to enlarge :. Step 3: Now it is time for the switching arrangement to be connected up. This cable consists of three cores â€"brown, grey and black, which are all Line colours and an Earth wire. This is how the two-way switch wiring should look like:. Step 4. Now it is time to wire up the second two-way switch. Connect the black wire coming from the first two-way switch to the L1 terminal, connect the grey wire to the L2 terminal and connect the brown wire to the C common terminal. Once connected it should look like this:. Additional lights can be connected parallel to the first light. Think of it as loops from one light to another, as many as needed, all parallel to each other Line to Line and Neutral to Neutral. What if you have to wire up other areas with different switching arrangements from the same circuit? To achieve this, just continue the supply cable from the first light to the second area. Think of it as lopping the supply cable from one area to the next one, always from the first light to the first light in the next area. Of course, once the supply is in the new area, a new switching arrangement will have to be wired up to operate the light or lights in the area. This concludes our guide for wiring a two-way lighting circuit. On the next pages we'll describe how to wire a three-way lighting circuit. Do not forget - electricity kills! Make sure you take all the precautions necessary to work safe. Before working on an existing electrical installation, or before connecting a new circuit to one - carry out a full Safe Isolation Procedure! This guide will help you understand the procedure required. Work smart! Work safe! All Rights Reserved. Two-Way Lighting Circuit Wiring. Wiring guides How to wire a simple lighting circuit Two-way lighting circuit wiring Three-way lighting circuit wiring Ring Main circuit wiring. Navigation Home Downloads About us Contact us. Subscribe to our mailing list. Home How to How to wire a 2 way switch. Wiring a 2-way switch is about as simple as it gets when it comes to basic house wiring. First of all we need to go over a little terminology so you know exactly what is being discussed. It should also help in understanding the functions of each type of switch. The cable consist of a black wire, a white wire and a bare copper wire. When wiring a 2-way switch circuit, all we want to do is to control the black wire hot wire to turn on and off the load. Now in the diagram above, The power source is coming in from the left. Notice the black wire is the only wire that we are controlling through the 2-way switch. You have an incoming hot wire black going to one screw it does not matter if you use the brass or silver screw on the side of the 2-way switch and a black wire from the other screw on the 2-way switch going to the load light, ceiling fan etc.. The white wires are wire nutted together so they can continue the circuit. Now as for the ground wire. It is very important to connect the ground wire to the switch as well. The Green screw on the 2-way switch is for the ground so all ground wires should be connected as seen below. All ground wires bare copper are all now connected incoming ground, load ground and switch ground. This makes for a safe protected circuit by having all grounds intact. So what have we accomplished. By wiring a 2-way switch, The circuit below shows the basic concept of electricity flow to the load. Let's assume the load you are controlling is a light. The electricity flows from the hot wire black through the 2-way switch shown in off position and then

to the light and returns through the neutral wire white. This is a completed circuit. Now by understanding the diagram above, go up to the top diagram and by using the concept shown here, just use your mouse pointer on that diagram and follow the flow from black wire hot wire to the load and return through the white wire neutral. This should give you a good basic understanding how the 2-way switch circuit works and will help you in adding or changing a 2-way switch. So now that you have a basic concept of wiring a 2-way switch, let's look at the following 2-way switch diagrams to see which type of circuit scenario you have. After you have pulled your switch out from the wall, the wires in the box and connecting to the switch should look like one of the following. How To Wire It. Here's How. Thank you. Please keep Going. Are you scratching the head and stuck with your QuickBooks related issues, you're going to be just one click definately not our expert tech support team for your QuickBooks Support Phone Number USA related issues. When you are looking to wire a two way switch there are easy ways to do it and complicated ways to do it. A two-way switch is one of the most basic parts of house wiring. You need to make sure that you understand the terminology and that you are completely comfortable with the lingo that is being discussed in the process. There are many configurations for wiring and making sure that you accomplish your goal. Many of the ways that you plan on how you are going to do it depend directly on where your power is located. We are going to look at how to wire a two-way switch. Caution :. When you are ever working with electricity you need to make sure that you turn off the power before work is started. You want to know that it is completely off and dead. The power source comes from the fixture and then connects to the power terminal. You will see that there is a hot wire that is then spliced through a switch and that then goes to the hot terminal of the light. It is very important to make sure that you have marked the wires as well so that it is clear what is neutral and what is not. Unknown April 15, at PM. Mathew April 17, at AM. Kasab April 19, at AM.
